

Safe Community Coalition Presents The 4th Annual Cyber Summit

Keeping Pace with Kids' Internet & Digital Technology Use: Empowering Parents

Learn how to help your child safely navigate the social networking world of the Internet and other digital technology. Find out how as parents we can help protect our children's digital reputations, which are put at risk by their use of Facebook, MySpace, online gaming, emailing, texting, sexting, and, cyber-bullying.

Iris Beckwith, President of connectED4safety LLC will speak to adults in our community, empowering parents with concrete options for managing our children's Internet world. The focus of this talk will not be scare tactics, but clear education about social networking, as well as helpful hints and guidelines useful for monitoring your child's Internet use. Successful family use scenarios will be outlined. Ms. Beckwith has 17 years of prevention education experience with Childhelp of Virginia, as VP of the Internet Keep Safe Coalition, and has provided training to Penn State University's Dept of Education, DARE, and many other organizations.

Thursday, February 25, 2010
7:30 pm
Cooper Middle School Cafeteria
977 Balls Hill Rd, McLean VA
(Snow Date is Tuesday, March 2, 7:30)
